Objectives

Our Operational Excellence and IT Governance, Enterprise Risk Management and Business-IT Alignment Special Interest Working Group focuses on the roles of boards, shareholders, and other stakeholders that play an essential role in the scientific areas of operational excellence and IT Governance, Enterprise Risk Management and Business-IT Alignment corporate culture. It aims to provide practical insights, academic projects, academic professional networks and study results on how all entities/actors can fulfill their responsibilities effectively, sustainably, and in line with current empirical results.

The objectives of the Special Interest Working Group on Operational Excellence and IT Governance, Risk and Business-IT Alignment can be named as follows:

- Strengthen and build unique expertise related to the above areas.
- Discussion of concrete issues and development of projects and research proposals
- Combine/compare the current developments in the practice of different nations
- Mutual learnings
- Open exchange of experiences and networking
- Network and collaboration with a multinational research team
- Special session at the EBEEC 2024

The Special Interest Working Group on Operational Excellence and IT Governance, Risk and Business-IT Alignment meets twice a year and focuses on a defined topic at each meeting.
